

**METHOD FOR REDUCING UNDESIRABLE ODORS  
GENERATED BY PAPER HAND TOWELS**

Abstract of the Invention

5 A process for manufacturing a cellulosic paper product  
is provided. The process comprises forming an aqueous  
suspension of papermaking fibers; depositing the aqueous  
suspension onto a sheet-forming fabric to form a wet web;  
dewatering the wet web to form a partially dewatered web;  
topically applying a glycol compound selected from the group  
consisting of polyethylene glycol, triethylene glycol,  
glycerol and mixtures thereof to the partially dewatered  
web; and drying said wet web. The present invention also  
provides for cellulosic paper products exhibiting a reduced  
malodor upon wetting.
